

You're invited to our 2008 Chattanooga Ethanol Workshop!

What: Workshop for anyone interested in learning about ethanol - includes free lunch!

When: **Wednesday, March 26 from 9am – 1pm**

Where: Wally's Restaurant
6521 Ringgold Rd
Chattanooga, Tennessee 37415

Directions: From the I-75 and I-24 interchange on the east side of Chattanooga, go south on I-75 toward Georgia roughly one mile to the first exit, Exit #1. Exit to the right and turn right on to Ringgold Road. Wally's is immediately on your right.

RSVP: Please RSVP by contacting Tasha Boeckmann (NatashaB.cleanfuels@gmail.com, or 865-974-1880) your name, company name, number of attendees and contact information (email address and phone number). If emailing her, note that you are registering for the "Chattanooga Ethanol Workshop."

Deadline: RSVP at your earliest convenience, by Monday, March 24 if possible!

This is your company's opportunity to learn about ethanol and how you can be prepared for the change that is taking place in our country. Domestic, renewable, American fuels can help our country become less dependent on petroleum, especially that which is foreign sourced – something that is critical to our future. Additionally, they can help your fleet save money and help your vehicles last longer, if done right. This workshop will give you the info you need to begin putting ethanol into action in your fleet or company.

Specifically, it is important for you to begin learning about ethanol for a couple of reasons:

- ▶ We are living through a major period in our (U.S. and world) history; ethanol is leading the way as one component of change in our transportation fuels' landscape
- ▶ The segue from corn to cellulosic materials is just getting started; learn more about what is happening in East TN and across the U.S. to push this transition
- ▶ E10 has become almost widespread in East Tennessee while there are now three E85 stations open (another three are opening soon)! Fuel suppliers – you can start using ethanol to your advantage to show your customers that you care for your country, their vehicles and the bottom line, too!

Consider sending one or two people from your company to come and have lunch with us!

In the workshop, there will be presentations on:

- ▶ why using these fuels is important to your country and community
- ▶ what ethanol is and where it comes from; ethanol's pros and cons
- ▶ what fleets in the U.S. and in East Tennessee (as example) are using E85
- ▶ how you integrate ethanol into your current refueling infrastructure

Sponsored and hosted by the East TN Clean Fuels Coalition
in partnership with the TN Interagency Alt Fuels Working Group
