

## You're invited to our 2006 Cleveland Biodiesel Workshop!

**What:** Biodiesel workshop for any current diesel user or distributor  
- includes free lunch

**When:** Thursday, September 28 from 9am – 1pm

**Where:** Holiday Inn Cleveland-Mountain View (Exit 25 off of I-75)  
I-75 & State Route 60 (25<sup>th</sup> Street)  
Cleveland, Tennessee 37312  
> there's plenty of parking; see maps for local directions

**RSVP:** Please RSVP by emailing ([eamcleanfuels@gmail.com](mailto:eamcleanfuels@gmail.com)) or faxing (865-974-1838) your name, company name, number of attendees and contact information (email address and phone number at least); Note on your RSVP that you are registering for the "Cleveland Biodiesel Workshop"

**Deadline:** RSVP at your earliest convenience please, by Sept. 22 if possible

This is your or your company's opportunity to learn about this rapidly growing alternative fuel and how you can be a part of this wave of change for the United States of America. This domestic, renewable, American fuel can help your fleet save money, help your diesel vehicles last longer, in addition to helping our country become less dependent on foreign sources of petroleum. This workshop will give you the information you need to begin using biodiesel in your fleet, or begin selling biodiesel from your station or dispensers.

It is important for you to begin learning about biodiesel for a couple of reasons:

- Since Rudolph Diesel invented his engine, there's been one fuel for it. *Now there's two!* Use this to your advantage to save money on diesel fuel.
- Biodiesel can help your diesel vehicles' engines last longer, saving you money
- Fuel economy gains can further save you money
- 24 biodiesel stations have opened all across East Tennessee in the last two years! Fuel suppliers can start using the biodiesel to your advantage to show your customers that you care for your country and their vehicles and bottom line, too!

*Consider sending one or two people from your company to come and have lunch with us!*

In the workshop, there will be presentations on:

- what biodiesel is and where it comes from; biodiesel's pros and cons
- why using this fuel is important to your country and community
- what fleets in the U.S. and in East Tennessee are using biodiesel blends
- how easy it is to integrate biodiesel into your current diesel infrastructure
- hear from current users themselves about their use of biodiesel

Sponsored and hosted by the East Tennessee Clean Fuels Coalition
