

You're invited to our first Biodiesel Fleet Training Workshop.

What: Biodiesel training for fleets, focusing on virgin soybean oil-based biodiesel
- includes free lunch

When: Thursday August 25 from 11am - 3pm

Where: Ramsey's Cafeteria
5331 Central Avenue Pike
Knoxville, Tennessee 37912

RSVP: Call (865) 521-5010 and register your company's attendees – ask for either Philip Freels or Steve Smith to register

Deadline: RSVP no later than Wednesday, August 24

This training opportunity will give you the information you need to begin using biodiesel in your fleet. This domestic, renewable, American fuel can help your diesel vehicles last longer, in addition to helping our country become less dependent on foreign sources of petroleum.

It is important for you to begin learning about biodiesel for a couple of reasons:

- ▶ biodiesel can help your diesel vehicles' engines last longer, saving you money
- ▶ fuel economy gains can more than offset any incremental cost you might pay, further saving you money
- ▶ cleaner oil and filters can allow for increasing the time between oil changes, potentially saving you even more money
- ▶ states are beginning to look at mandates for the amount of biodiesel that must be blended into all diesel sold in the state, with MN having already implemented B2 statewide

Consider sending one or two people from your company to come and have lunch with us!

In the workshop, there will be presentations from:

- ▶ A major soybean oil-based biodiesel producer who will discuss their production and the benefits of their product to your diesel vehicles
- ▶ An additive supplier who will detail important information that is needed when moving to a biodiesel blend
- ▶ A representative from the local Clean Cities coalition who will be there to answer questions about biodiesel's use in and around the state of Tennessee

Cosponsored by the East Tennessee Clean Fuels Coalition
